

⚡ Lightweight GPS Tracker

Small, lightweight tracker designed for common use cases with an estimated battery life up to 6 years*.

🔒 Heavy Duty GPS Tracker

Large, heavy-duty tracker for more strenuous use cases, with an estimated battery life up to 10 years*. **Includes built-in tamper detection** to alert if it's removed from an asset.

🚗 OBD GPS Tracker

Utilizes vehicle-centric sensors to provide additional information, such as run hour monitoring, driver safety alerts, and accident/rollover detection. **Draws power from the OBD port, but does not access data.**

🔧 OBD GPS Tracker + Diagnostics

Remotely sends information from the vehicle's OBD, including DTCs and other vehicle diagnostics.

📡 CAN Bus GPS Tracker + Diagnostics

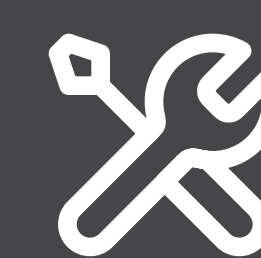

Remotely sends information gathered from the vehicle's CAN bus, allowing the device to collect specific data from a wide range of machinery. *Coming Q4 2024.*

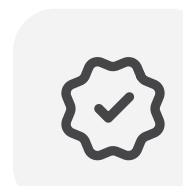

📷 Dashcam

Records front-facing footage and automatically saves footage in the event of a collision.

Superior Service

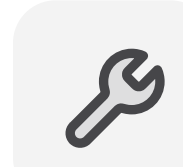

Your asset tracking solution is expertly designed, thoroughly verified, and fully supported by Safety Design.

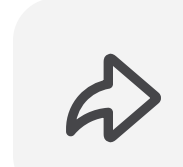

Premium Quality

Our devices are meticulously selected for their reliability, robustness, and longevity. We prioritize quality to ensure your assets are tracked with precision and dependability.
